**Preparing the blood glucose test**

1. Extract the test strip and prime the lancet by sliding the bottom cover down until you hear a “click”.

**Collecting the blood sample**

2. Press your finger tip against the lancet-holder and release the needle by pressing the trigger button.

**Performing the blood glucose test**

3. **A** Place the blood sample in contact with the test strip.
   - The result will be displayed after five (5) seconds.

**Removing the strip and replacing the lancet**

4. **A** Remove the used test strip from the meter.
   - **B** To replace the lancet see Point of the System Setup on the back of the device.
